PATENT APPLICATION  
Navy Case No. 95,757

### Remarks/Arguments

The claims now presented 33 and 34 were previously presented as claims 22 and 26 and filed in U.S. Patent Application 10//284,393. These claims were rejected under prior art U.S. Patent 4,283,777 and Japanese Patent 04337530A as well as U.S. Patent 5,315,575. The applicant's attorney submits that the claims as they are currently presented are not anticipated or rendered obvious by these references because the features claimed by the applicant when read in the context his disclosure are in fact different from those shown in the prior art references. In view of the applicant's amendment of the previous application 10/284,393, the Examiner is asked to review the earlier art rejection in light of the applicant's disclosure and to pass this application to allowance at the earliest possible date.

Kindly charge any additional fees due or credit overpayment of fees to Deposit Account Number 50-0281.

Respectfully submitted,  
  
John J. Karasek, Esquire  
Reg. No. 36,182  
Associate Counsel (Patents)
